

Jiang Feng Curriculum Vitae

Dr. Jiang Feng received his M.D and PhD in Clinical Medicine in 1995, and got EMBA in 2006; Jiang is currently appointed the executive chairman and CEO of China Association for Medical Devices Industry (CAMDI), Chairman of China Strategic Alliance of Medical Device Innovation, Deputy Director of China National Biomedical Engineering Education Supervisory Committee. Dr. Jiang is also the standing director at many associations and guest professors at a number of universities. Jiang is also an expert consultant for the Ministry of Health, CFDA, Ministry of Science and Technology(MOST), Ministry of Industry and Information Technology, and a number of national and local medical science parks.

After working in the hospital as a thoracic surgeon for 12 years, Jiang founded Shaanxi Huaxin Pharmaceutical Co. in 1997 which focused on drug research and distribution. Huaxin was later sold to a listed company after three years of rapid growth, its R&D product made huge profits in the following years. Because Huaxin's success, Jiang was invited to work for Sinopharm, the largest national medical devices and pharmaceutical group. The following 10 years saw him bringing considerable growth to the business. During his 7 years' term as the general manager at China National Medical Equipment cooperation(CMIC), Jiang established the largest medical device distribution system in China, with annual revenue exceeding 1 billion RMB (2008). He successfully restructured CMIC, transforming the company from an exhibition-focused business to a large scale production and marketing enterprise. Jiang had served as the chairman & CEO of China Association for Medical Devices Industry (CAMDI) for 14 years, during which he participated in many policy-making processes that impacted the whole industry. While in CAMDI, Jiang visited over a thousand members and provided services for many of them, directly leading to CAMDI's rapid growth to more than 3000 members. In 2009, Jiang left CMIC to become the Chairman of China Strategic Alliance of Medical Device Innovation, an organization initiated and established by MOST. Today, the alliance has assisted MOST to finance and manage hundreds of medical devices innovation projects, the total budget of which amounts to over 2 billion RMB.

Most recently, Jiang has focused on financing and other services for innovative medical devices

projects, Working with his team, Jiang has already helped many domestic and overseas startup projects successfully land in science parks by connecting them with capital and partners In China, Jiang has set up several one-stop service centers in some top science parks for innovative medical technologies; Jiang serves as independent director and expert consultant in many listed companies and VC.

Entrusted by the Ministry of Science and Technology, Jiang Feng's team undertakes the National Medical Device Innovation and Entrepreneurship Design Competition and the Chinese Medical Device Innovation Service Exhibition. As the only Chinese cooperative partner of Germany MEDICA in China, this team annually organizes European and American innovation companies, well-known universities and research institutions, as well as domestic medical device industry and investment institutions to carry out a series of activities, which promotes the innovation and development of domestic industry.
